

# How To Install Plugins In Final Cut Pro

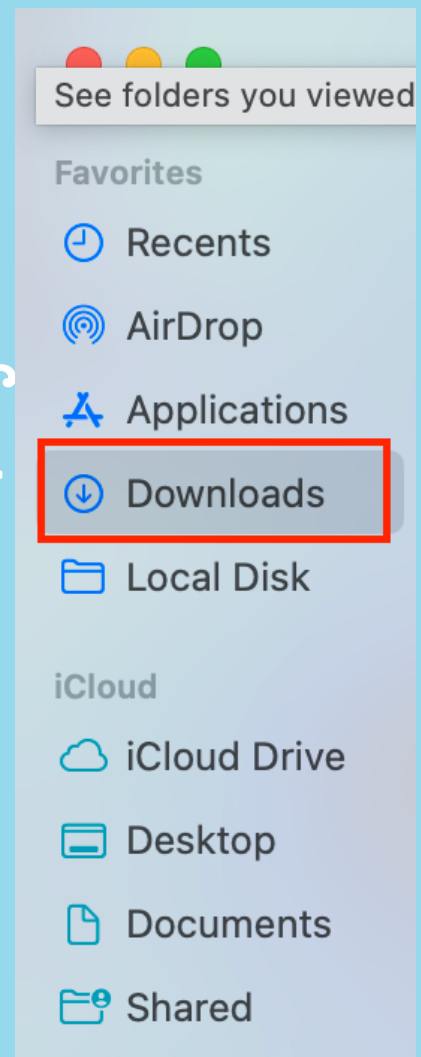

Go to page 2 if you have  
own Apple Motion.

Go to page 6 if you do not  
own Apple Motion

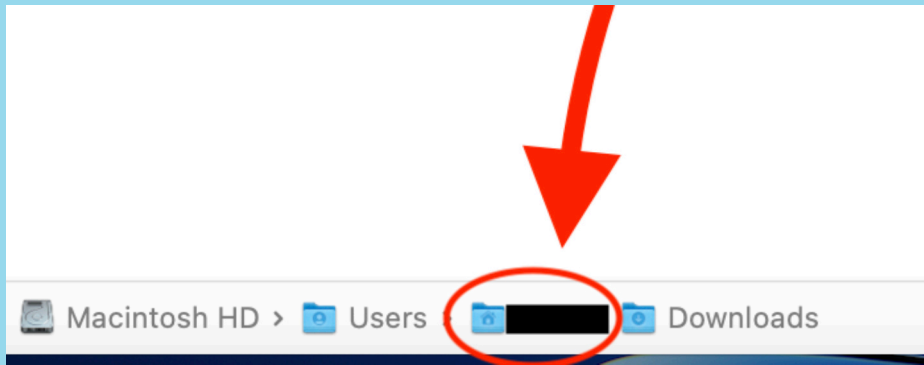

# If you own Motion

Then go to your  
Downloads folder

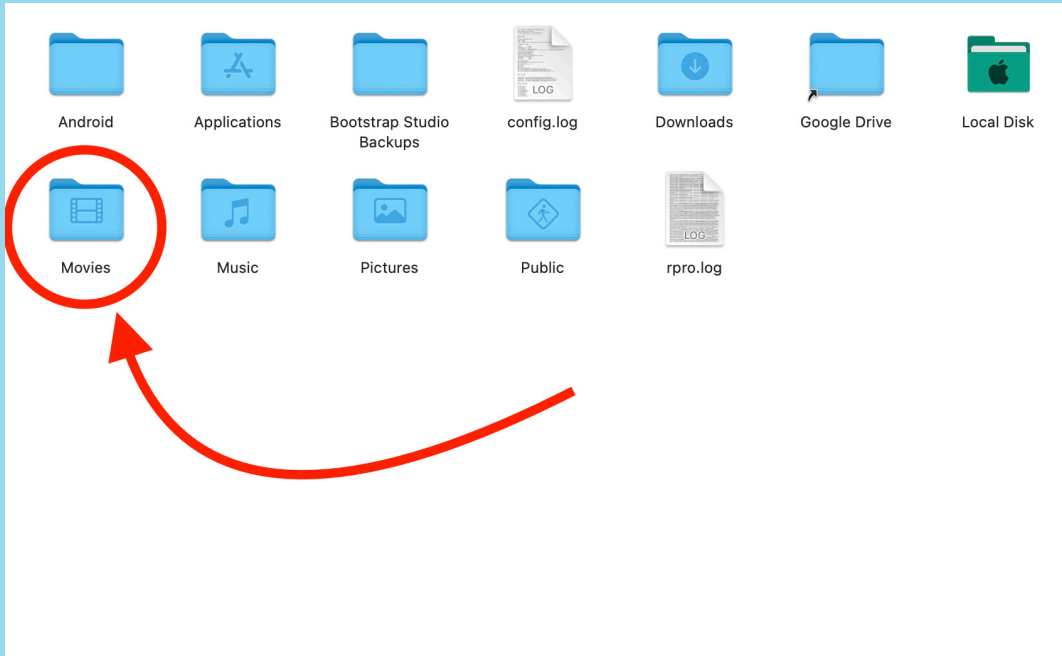

# If you own Motion

Go to the users folder at  
The bottom of the window

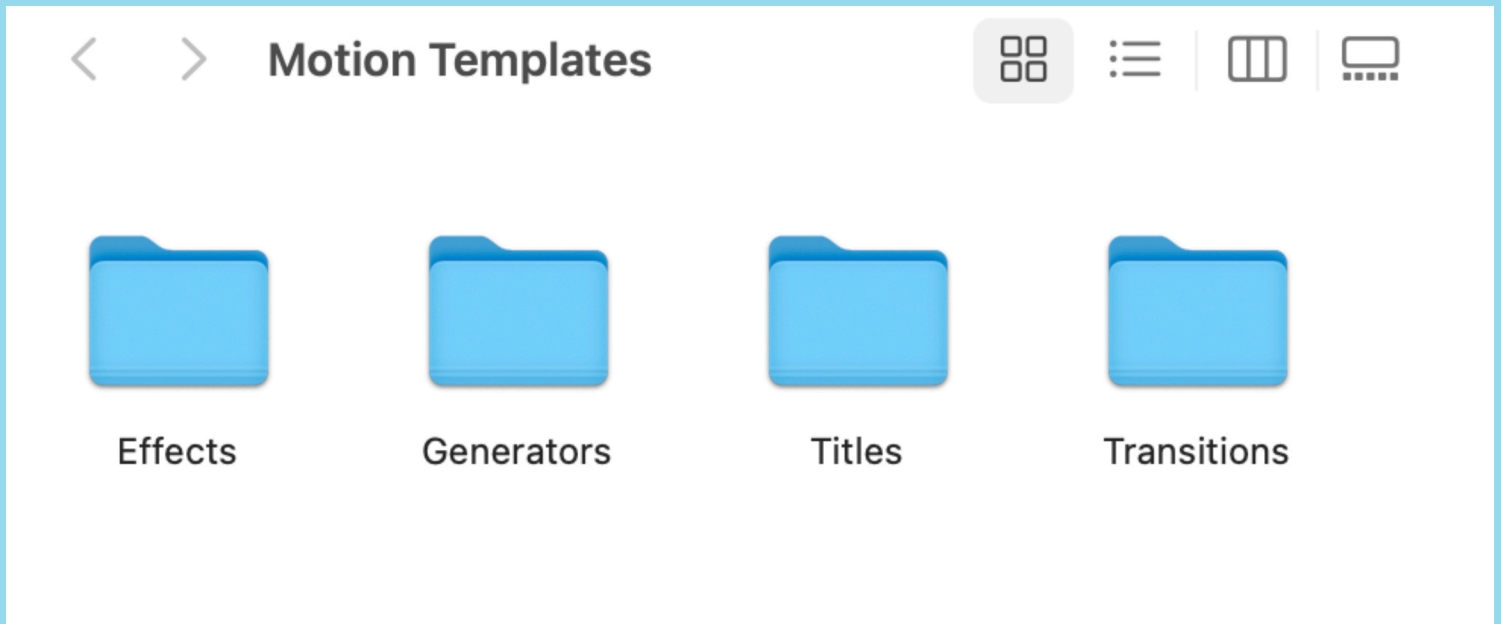

If you don't see this go to  
“Macintosh HD” > users >  
(your username)

# If you own Motion

Go into the  
“Movies” folder

# If you own Motion

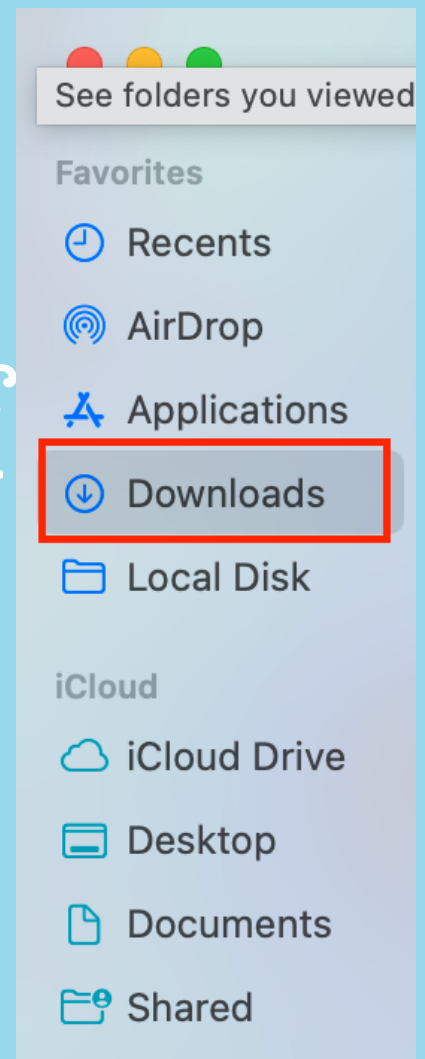

Copy the plugin  
into the plugin type  
folder

If Final Cut  
was running  
quit and reopen  
it and you should  
see your  
imported plugin(s)!

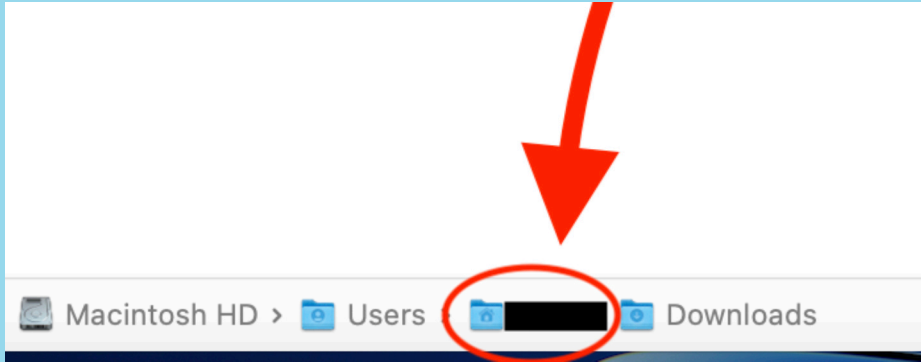

# If you don't own Motion

Then go to your  
Downloads folder

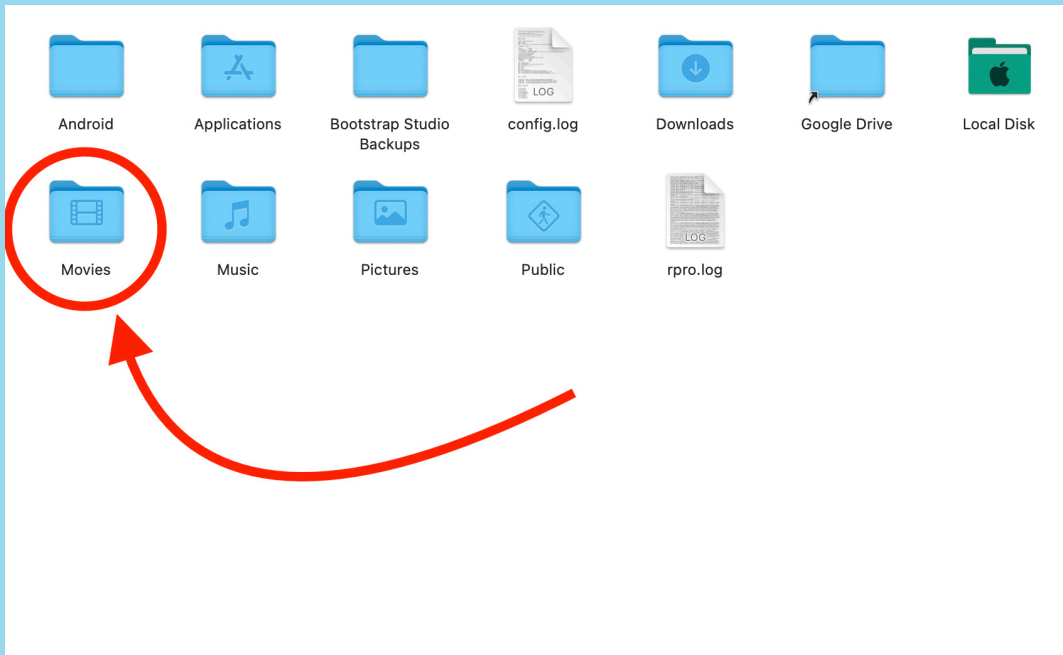

# If you don't own Motion

Go to the users folder at  
The bottom of the window

If you don't see this go to  
“Macintosh HD” > users >  
(your username)

# If you don't own Motion

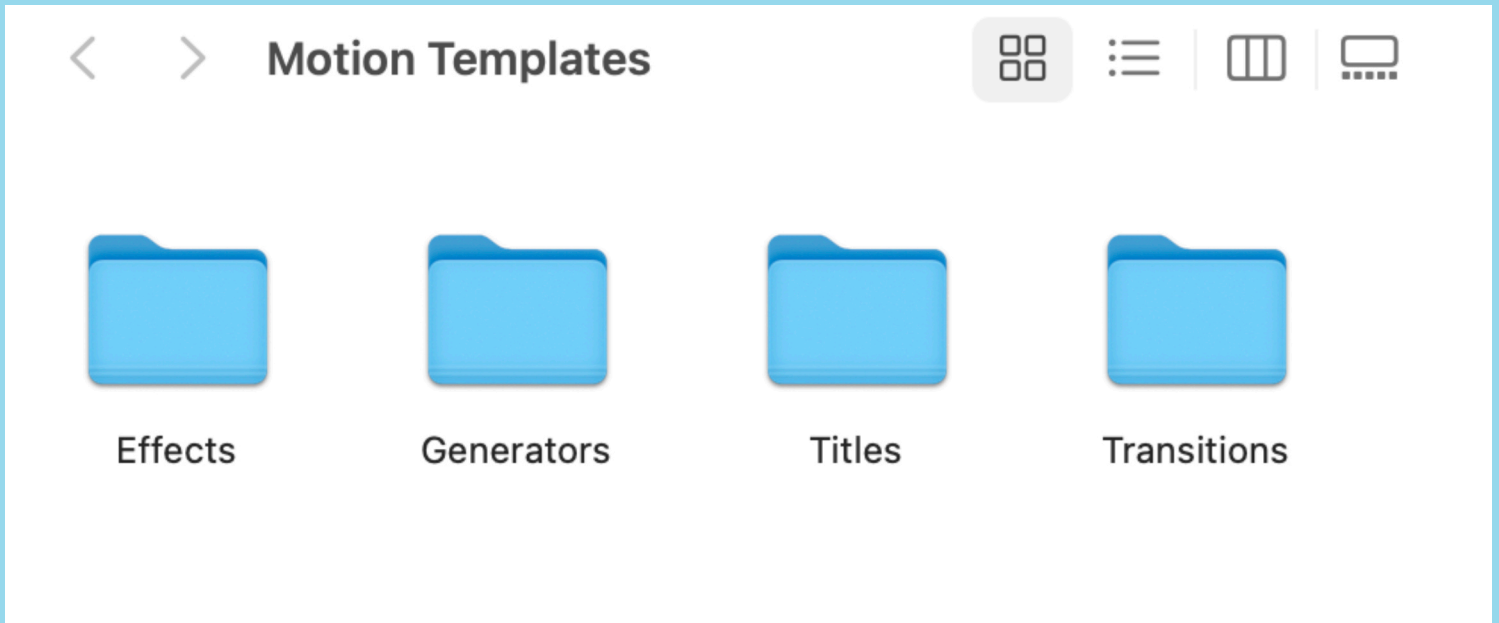

Go into the  
“Movies” folder  
and open it

Copy the included  
“Motion Templates”  
Folder into “Movies”  
and then open it

# If you don't own Motion

## Copy the plugin into the plugin type folder

If Final Cut  
was running  
quit and reopen  
it and you should  
see your  
imported plugin(s)!
